

# Personal Health Evaluation

Name	Start Date
------	------------

## Why chart your results?

When trying to improve your health, recognizing even the smallest progress is essential. Charting changes and improvements tell you what's working and what isn't. Many times people don't notice when small symptoms slowly diminish or go away... But wait! That's huge! Every disease starts with small symptoms, so if some them are slowly disappearing, then you're making progress. Keep doing whatever you're doing! This chart was designed to make you aware of those changes and improvements.

## How to use this chart:

- In the left column, rate any conditions that apply on a scale of 0 to 5
- 0 = no concern / symptom free,
  - 5 = Exhibiting strong symptoms, big area of concern, needs serious attention, interferes with ability to fully enjoy life

On the back, write a brief description of your health challenges and goals, then update by date.

## AFTER 90 DAYS ... THE LOWER THE NUMBER ... THE HEALTHIER YOU'RE BECOMING!

CONDITION	Present	14 Days	30 Days	60 Days	90 Days
Aching Joints	_____	_____	_____	_____	_____
Allergies / Hayfever	_____	_____	_____	_____	_____
Belching, Burping, Gas after Meals	_____	_____	_____	_____	_____

<b>TOTAL POINTS</b>	<input style="width: 80px; height: 20px;" type="text"/>	<input style="width: 80px; height: 20px;" type="text"/>	<input style="width: 80px; height: 20px;" type="text"/>	<input style="width: 80px; height: 20px;" type="text"/>	<input style="width: 80px; height: 20px;" type="text"/>

### Tips for success:

- Be consistent with your supplements
- Strive for a diet of at least 80% natural, unprocessed foods
- Drink a minimum of 8 glasses of non-chlorinated water per day (tea, sodas, sports drinks, etc. don't count) - It must be plain water
- Get some form of exercise several days per week; anything that gets you moving! Even 15 min. of walking per day will be beneficial
